Passionate Front-End Developer and Python Programmer skilled in HTML, CSS, and JavaScript, with a growing focus on Data Science. Proficient in building responsive, user-friendly web interfaces and writing clean, logical code. Experienced in UI design using Figma, Canva, and graphic design tools. I blend creativity with functionality to create visually appealing and intuitive experiences. I have a strong background in content writing, which helps me communicate and tell stories effectively alongside technical work. I am a fast learner with a curious mind. I aim to blend design, development, and data to deliver meaningful, user-focused solutions. I am always ready for the next tech challenge.

Experience / Project

Virtual Internship (Tata group)   *Jan 2025*
- **Tata Group - Data Visualisation: Empowering Business with Effective Insights Job Simulation Forage**
- Framing the Business Scenario
- Choosing the Right Visuals
- Creating Effective Visuals
- Communicating Insights and Analysis

Interactive Solar system model(Project)
- Theme: The website is a solar system explorer, showcasing planets and their moons using interactive visuals, entirely styled and animated with CSS.
- User Interaction: Users can select a planet using radio buttons to view detailed descriptions, imagery, and even related moon data, with smooth CSS transitions.
- Design: The site employs a 3D perspective and animated backgrounds, giving an immersive, space-themed feel with each planet having its own unique visuals and color-coded identity.
- Technology: It is built purely using HTML and CSS, without any JavaScript, showcasing creative and advanced CSS capabilities like 3D transforms, transitions, and user input styling.
